

**FROM ORDER ENTRY**

**...TO FINAL SHIPMENT**

**PATENTED MULTI-CARRIER SHIPPING TECHNOLOGY**

ConnectShip provides the patented multi-carrier technology for 20% of the top 100 companies on the Fortune 500. Scalable and customizable, ConnectShip products and the carrier compliance engine give you the ability to go from doing business within the local market to the global marketplace, whether you're shipping 50 or 50,000 packages daily.

**REGIONAL, LTL, SMALL PACKAGE, AND FREIGHT**

From order entry to final shipment, the ConnectShip multi-carrier compliance engine helps companies save money, reduce expenses, and get the product in the hands of the customer.

ConnectShip solutions provide multi-carrier compliance whether you ship with major international carriers, regional carriers, or LTL and freight carriers. With our patented multi-carrier software, you will know that your labels and other shipping documents are fully compliant, reducing errors, fees, and delays for customers.

**FLEXIBILITY AND SCALABILITY**

**Flexibility.** One of the most valuable aspects of using ConnectShip software as your shipping engine is flexibility. You can integrate shipping or shipment rating into an ERP, warehouse management system, your website, or other business systems. As your business grows, you can scale the solution by adding components and additional shipper locations, including international origins.

**CONNECTSHIP AT A GLANCE**

- Backed by UPS, with the financial security of the world's largest parcel shipping company
- Multiple-carrier shipping and return labels, electronic manifesting, rating comparisons, and shipping documents
- Innovations in shipping software such as Prologistics AMP, an XML message-based interface that enables standard web service and custom message processing
- Integration to multiple systems including Oracle and SAP applications
- Five patents for Logistics System for Automating Transportation of Goods

### Is ConnectShip the right fit for you?

### CONNECTSHIP® TECHNOLOGY

At ConnectShip, our goal is to make shipping software that fits into the way you do business and prepares you for growth. All ConnectShip products are based on the common technology called *Prologistics*. *Prologistics* means power for package shipping, shipment rating, and electronic manifesting. Prologistics technology powers the entire ConnectShip product line (including ConnectShip® Toolkit and ConnectShip® Warehouse.)

### A FEW OF OUR PRODUCTS

#### ConnectShip® Warehouse

ConnectShip® Warehouse can be integrated with your business databases. It has an interactive shipping screen which allows you to perform custom functions through scripting.

#### ConnectShip® Toolkit

ConnectShip® Toolkit offers our highest level of integration and flexibility. With it you can add shipping functionality into the user interfaces of your existing business software, build a custom interface, or even have a fully automated system with no user interface.
