- Truck Load Carriers

Gain the ProShip Advantage.

Speed.

ProShip can handle thousands of packages per hour on a single server, while supporting the most complex shipping methods, procedures and business rules. It maintains all of the data associated with shipment history, interfaces to carriers for live package status and delivery updates, and can be configured to let your customers view their own orders and shipment information. And ProShip grows along with you. No matter how much your volumes increase, ProShip will be the only shipping software you'll ever need.

Multi-Carrier Compliant.

ProShip is certified to prepare your packages for parcel carriers, trucks, rail or freight forwarders on a global basis. It can extend the rate shopping and accountability benefits of sophisticated multi-carrier shipping to your entire company, including advanced desktop shipping for office and warehouse employees. ProShip also offers the entire range of certified modules, so you can buy only what you need. And when carriers introduce new requirements, ProShip integrates them first.

Customer Support.

Exceptional customer support sets ProShip apart. It starts with installation, managed by a team of software engineers dedicated to your business. And it never stops, with unique resources from ProShip. The ProShip Customer Advocate is your link to ProShip services, assuring that your system is delivering optimum performance. ProCyclopedia gives you immediate access to on-line tools. Electronic monitoring recognizes any issues and takes action before problems develop, all to keep your packages on the move.

User Interface.

The ProShip user interface is all-encompassing to tailor the exact user experience you desire. Seamless integration with ERP systems and other applications means you can configure ProShip to maintain the interfaces workers are accustomed to using. Pop-up labels, animations, and sound effects guide operators through complex shipments. Dynamic screen layouts may be customized for alternate languages, on-the-fly forms and other preferences.
